

DIRTY WATER BUCKET

- Separates dirty water from clean water
- Preserves the quality and cleaning power of cleaning solution
- Isolated dirty water reduces risk of cross-contamination
- Helps produce cleaner, less slippery floors
- Divides liquid weight, less lifting power needed when emptying buckets

HOW IT WORKS

Traditionally, wringers release dirty water directly back in to the bucket's primary cleaning water.

Rubbermaid's Dirty Water Bucket nests below the WaveBrake wringer to collect the dirty water and keep it separate from the cleaning solution.
